

Parent Engagement Partnership: Communication Structure

What makes the PEP successful is the 2 way communication between the PEP and local agencies. This diagram shows the communication structure:

The PEP will feed information to the Children's Centres who will rotate this information around centres and feed back to the PEP

Phase 1 Children's Centres will feed information into **Phase 2** Centres (that are currently in development); **Locality Managers** will feed directly to the PEP

The PEP will feed information into the **Parent Groups** through the parents that sit on it; this information will then be fed back to the PEP through these Parents

The information will be fed to the **Clusters** via the Cluster Managers and fed back to the PEP via the two way communication process
